Web Page:

From my childhood years growing up on my grandparents' farm outside of Hilo, to my college days at the University of Hawai'i, I knew I was lucky to have been raised in a place as special as Hawai'i. Unfortunately, over the years, too many of our family and friends have left our great state in order to make a living for themselves. While working in the different branches of government, I realized that only by taking on a larger role in the community can I truly make positive and significant changes for our future. My vision is of a Hawai'i where children can grow up safely, build their lives, and eventually raise their own children without struggle. My professional experiences taught me that effective leadership and constructive collaboration are the keys to a successful and prosperous government. My family instilled in me the desire to work hard and listen to the needs of others. I want to give those ideals to our neighborhoods.

It would be an honor to serve you. With a fresh outlook and traditional values at the foundation, I will dedicate myself tirelessly to building a solid future for our community.
